

Managed Identity As A Service (MiDaaS)

Connect Everything. Securely.

Problem Statement

In a cloud-first, hybrid world supported by distributed data, Identity and Access Management (IAM) is fundamental to an enterprise's security architecture. Today, IAM is a critical component of cybersecurity strategy and serves as the first line of defense. It enables enterprises to grant specific users access to various applications and data across a rapidly expanding environment as part of a zero-trust architecture, which includes the emerging domain of edge computing.

Implementing an IAM solution for a customer requires careful planning, design, and expertise. Similarly, managing the IAM environment and keeping it up to date is a challenging task.

Managed Identity As A Service (MiDaaS) is HCLTech's delivery framework designed to address the comprehensive IAM needs of our customers.

MiDaaS offers the following key benefits:

End-to-End Managed Service

- Utilizes HCLTech's standardized service delivery methodology.
- Provides a predictable cost model and a flexible global delivery approach, enabling customers to adopt more services.
- Offers flexible options, including a mix of:
 - Licenses

- Professional services
- Operations

Global Delivery

- Options for dedicated, designated, or shared delivery.
- Standardized rate cards based on resource units.

Leverages skills across:

- Onshore (US, UK, Europe, Australia)
- Nearshore (Canada, Mexico, Europe, Vietnam)
- Offshore (India, Sri Lanka)

Built on Agile Ops Principles

- Aligns with Scrum or Kanban-based models for delivering engineering and onboarding projects.
- Utilizes a factory model for app onboarding with automation accelerators at different stages.

Transition & Transformation

- Day Zero readiness.
- Standard framework and artifacts.
- Accommodates complex and heterogeneous environments.
- Applies transformation best practices and experience.

Centralized Skills

- Provides complete IAM delivery under one roof through HCLTech's Identity Fusion Centers (iFDCs).
- Maintains a central pool of skilled resources to address skill gaps in the evolving IAM ecosystem.
- Continues investment in training and upskilling.

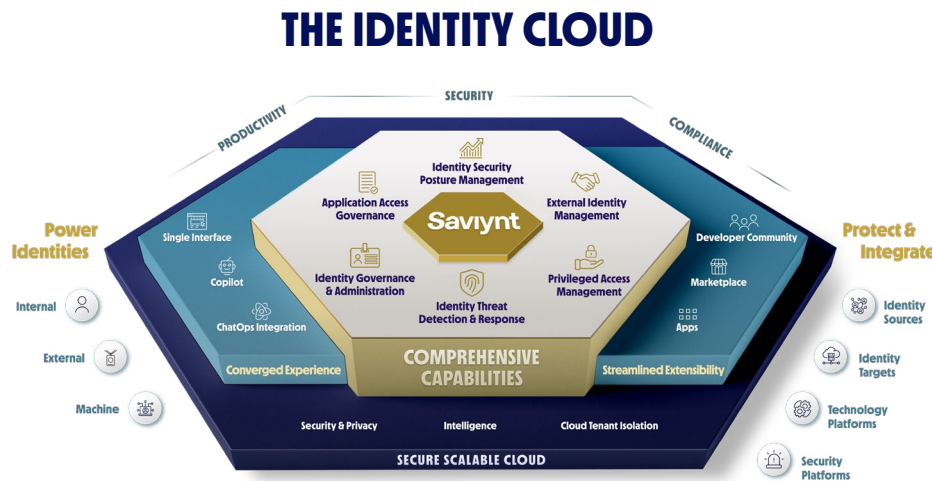

HCLTech MiDaaS offers the following benefits:

- Options for dedicated, designated, or shared delivery.
- Comprehensive IAM services under one roof.
- Automation-driven delivery using HCLTech's IAM accelerators and reusable artifacts.
- Agile approach for application onboarding.
- Global delivery model with centers across multiple regions.

Visibility

- Offers unified visibility of IAM controls, dashboards, and reporting functionality across multiple IAM technologies.
- Provides interactive analytics dashboards with cross-technology datasets for custom reporting.
- Ensures real-time visibility of the Identity system.
- Facilitates reporting for compliance and governance metrics.

The Identity Cloud combines core identity security capabilities in a single platform that enhances security while reducing costs and management headaches.

Solution Benefits

HCLTech's MiDaaS provides comprehensive IAM services at optimal costs through its shared delivery options where applicable. MiDaaS enables the automation and streamlining of application onboarding, automates SOP-driven activities, and reduces efforts for migrating from legacy IAM solutions. HCLTech offers project pool hours to address development and integration activities. Additionally, HCLTech's MiDaaS IAM dashboard and reporting capabilities provide a 360-degree view of the customer's entire IAM and PAM landscape.

ABOUT PARTNER

HCLTech is a global technology company, home to more than 224,000 people across 60 countries, delivering industry-leading capabilities centered around digital, engineering, cloud and AI, powered by a broad portfolio of technology services and products. We work with clients across all major verticals, providing industry solutions for Financial Services, Manufacturing, Life Sciences and Healthcare, Technology and Services, Telecom and Media, Retail and CPG, and Public Services. Consolidated revenues as of 12 months ending December 2023 totaled \$13.1 billion.

ABOUT SAVIYNT

Saviynt is the leading identity governance platform built for the cloud. It helps enterprise customers accelerate modern cloud initiatives and solve the toughest security and compliance challenges in record time. The Saviynt Enterprise Identity Cloud converges IGA, granular application access, cloud security, and privileged access into the industry's only enterprise-grade SaaS solution.
