Learning Methods

A variety of learning methods offer flexibility as you grow your Saviynt skills

Instructor-led

Learn directly from the experienced Saviynt Certified instructors. Delivered both virtually and in person, these highly interactive courses are a great way to accelerate your Saviynt skills through discussions and access to hands-on environments.

On-demand

View digital learning subscription solutions, accessible 24/7, for individual users and IT teams. This self-paced training is identical to classroom instruction and accessed through Saviynt Learning Management System. Learners have access to recorded training modules, course materials, and practice labs via Saviynt Litmos Portal.

Dedicated Class

Private training at your location is tailored to fit your time and delivery needs. The instructor focuses on your specific training needs and business goals. When training multiple team members, the cost per student is lower than the cost of a public class. We will help you define your requirements relative to your goals and set up private custom courses to meet your specific learning objectives.

Certification Exam

Saviynt Certifications validate the critical skills required to integrate and manage Saviynt Solutions that drive our customer's desired business outcomes. Certifications are organized into multiple product areas with levels for those new to the industry as well as experts in the field.

The Value of Hands-On Training

The only set of training programs and offerings built by the experts at Saviynt

Put theory into practice with realistic product experience using dedicated sandbox environment. Hands-on learning encourages critical thinking, and teaches troubleshooting approach using accessible resources

Retain Learning for longer time with the hands-on instruction approach. Lab infrastructure is provided for 7 days during instructor-led training and for 14 days during self-paced training.

Structured learning experience with a combination of theory and hands-on lab exercises wherein the learners follow step-by-step lab instructions to obtain desired learning objectives.

Social experience encourages learners to engage with the trainer and other attendees, thereby, creating a fun social atmosphere in the training.

“Very knowledgeable training session and doubts were cleared thoroughly.”

- IGA L100 Learner

“The training materials provided were amazing, they are simple, easy to follow, and practical tools for us to use in our work lives.”

- IGA L200 Learner

“A good introduction to the basics of Saviynt. The labs were good. I need to take the L200 course :-) Tinu did a great job!”

- IGA L200 Learner

“This training was very helpful in getting an insight into CPAM and providing us with the configuration basics, looking forward to L200 for CPAM to continue the journey towards learning CPAM.”

- CPAM L200 Learner

Validate your skills

Test what you know through examination.

The Saviynt Certification Program will contain a series of exams that allows you to:

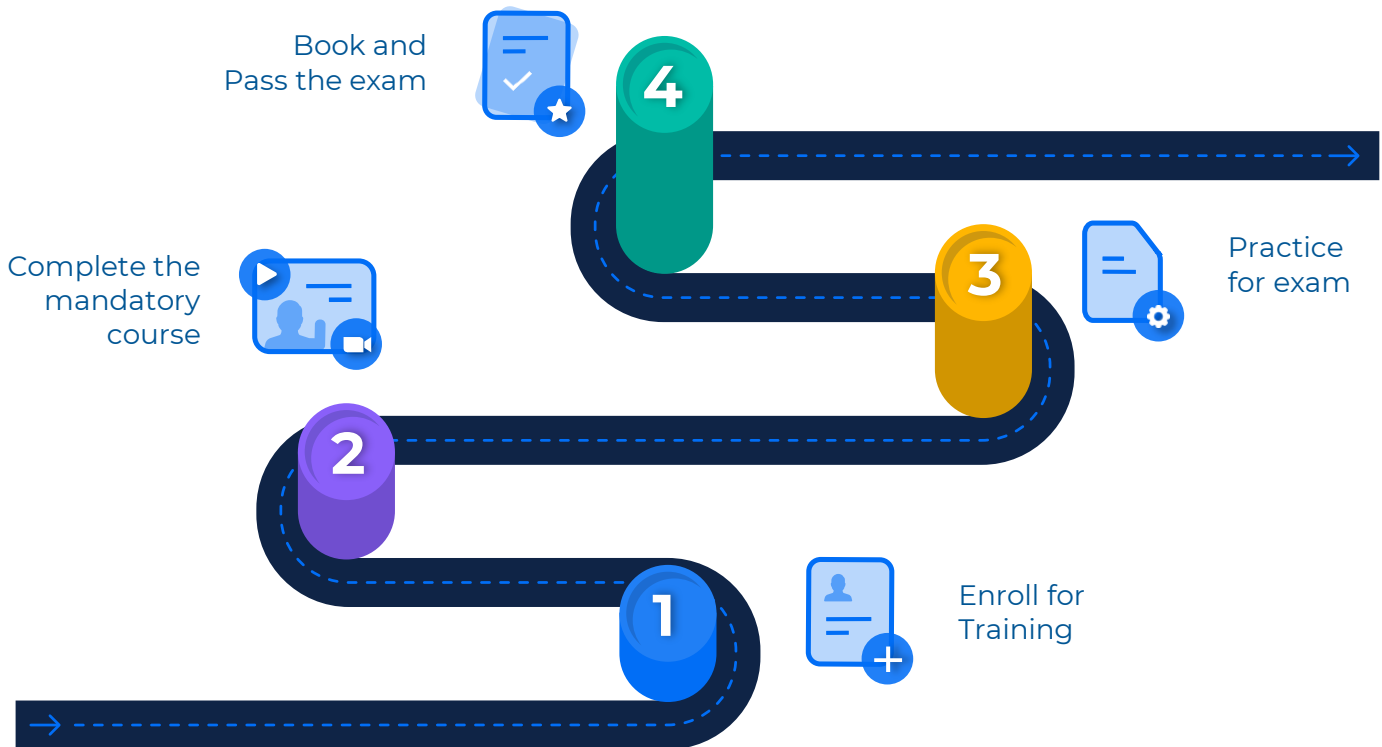

- Demonstrate your proficiency across Saviynt products and versions.
- Gain a competitive advantage by developing a skill set that's in demand, worldwide.
- Promote your personal brand in the global Saviynt community and marketplace.

It is the mission of the Saviynt Professional Certification Program to:

- Promote your personal brand in the global Saviynt community and marketplace.
- Develop a worldwide community of highly skilled certified professionals who recommend, sell, service, support and/or use Saviynt products and solutions.

Start your certification journey

Saviynt Certification Program-How to Certify?

Saviynt Certified IGA Professional

The Saviynt Certified IGA Professional (SAVIGA-C01) examination is intended for individuals who have the knowledge, skills and abilities to demonstrate basic understanding of the Saviynt Identity Governance and Administration (IGA) platform, including: available product features and common use cases.

The candidate will demonstrate an understanding of Saviynt IGA capabilities including: building identity warehouse, connected vs disconnected application onboarding, access request use-cases, access rules, segregation of duties, attestation, analytics, and value proposition of a Saviynt IGA solution.

SAVIGA-C01 certification validates candidate's ability to:

- Explain the value of Saviynt IGA offerings.
- Understand and explain Saviynt IGA deployment models.
- Understand the concepts of building an identity warehouse using Saviynt EIC.
- Understand user onboarding and offboarding procedures.
- Describe connected vs disconnected application onboarding.
- Describe common use cases for Access Request System (ARS).
- Describe common use cases for Segregation of duties (SoDs).
- Understand and explain Saviynt access Attestation capabilities.
- Understand and explain Saviynt Analytics and Reporting capabilities.

Minimally Qualified Candidate

We recommend that candidates have at least 6 months of hands-on experience with Saviynt IGA (SSM) platform in any role including IDM consultants, engineers, managers, decision makers, as well as those working in IDM sales, and pre-sales departments. The minimally qualified candidate (MQC) possesses skills in deploying, configuring, and managing Saviynt IGA solutions.

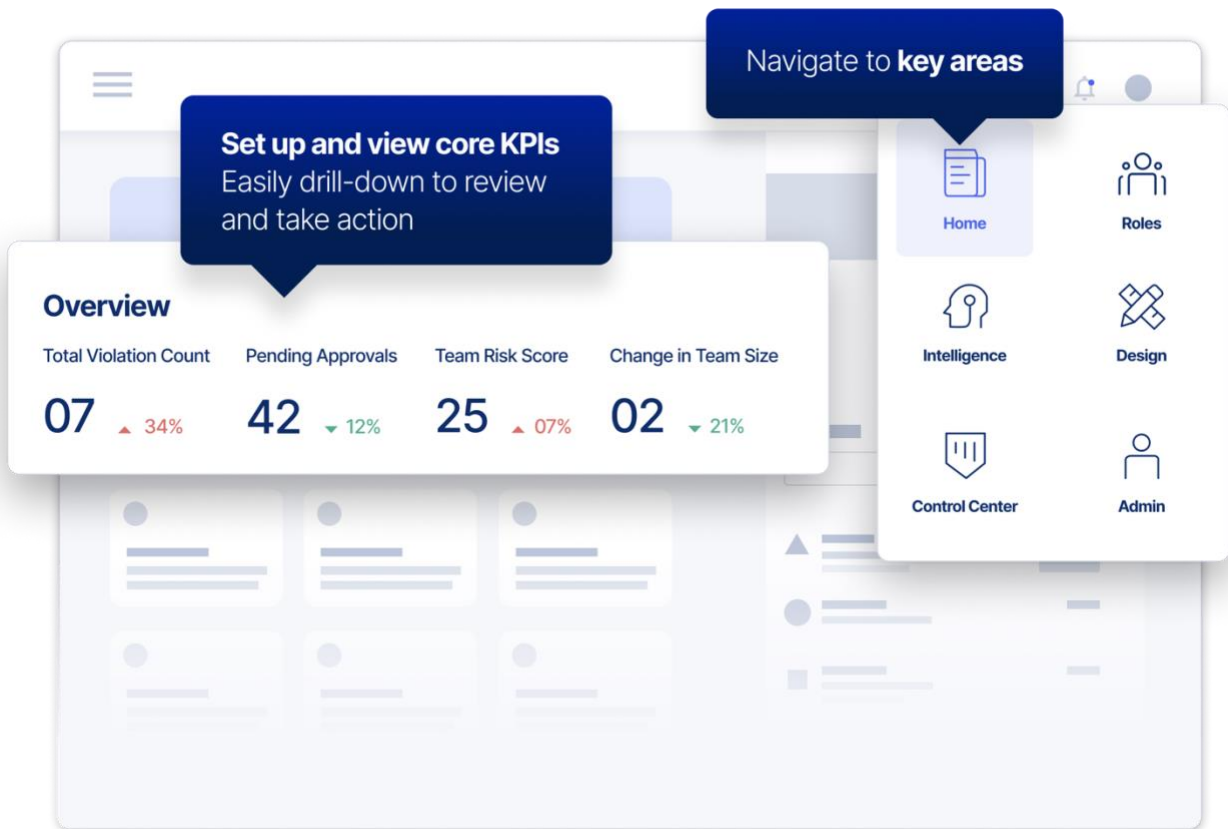

Exam Pre-requisite

It is mandatory to complete the Saviynt IGA Level 100 classroom or self-paced training before scheduling the exam.

Exam Duration

Saviynt Certified IGA Professional (SAVIGA-C01) examination contains 70 multiple choice questions and duration of the exam is 2 hours. Your results for the examination are reported as a score from 50–500, with a minimum passing score of 350.

Saviynt Identity Governance and Administration (IGA)

Available IGA Training Courses

- Saviynt IGA Fundamentals
- Saviynt IGA for Business Users
- Saviynt IGA Level 100
- Saviynt IGA Level 200
- Saviynt IGA Marathon
- Saviynt IGA for MSPs

Saviynt IGA Fundamentals

This self-paced training course focuses on covering the concepts related to IGA Fundamentals. The training provides a good preview of core concepts related to Cyber Security, Identity Access and Management, and Identity Governance and Administration. The IGA Fundamentals course outlines why Saviynt was established, its evolution, its product offerings, and its unique features as an identity platform.

Course Duration

- 3 hours of self-paced training
- 90% lecture and 10% Demo

Delivery Methods

- Self-paced

Target Audience

- Beginners, New Hires

Course Objectives

By the end of this course, you should be able to meet the following objectives:

- Explain the importance of Cloud Security.
- Learn about Identity and Access Management (IAM).
- Learn about Identity Governance and Administration (IGA).
- Understand the significance of IGA for an organization.
- Explain the differences between IAM, IGA, and PAM.
- Provide an overview of Saviynt as an identity solutions provider, its core values, features, activity types, challenges, and its evolution.
- Understand the significance of Saviynt.
- Explain the features of a successful IGA.
- Describe Saviynt's persona-based Access Request System.
- Describe the various types of Identity Access Rules offered by Saviynt.
- Describe the Password Management features in Saviynt.
- Familiarize with the concepts related to Access Reviews.
- Learn about Saviynt's IGA capabilities.
- Describe the various IGA concepts and related features of Saviynt.
- Describe the key features of Analytics and the various types of Analytics reports.

Saviynt IGA for Business Users

This self-paced training course focuses on covering the core concepts of the Saviynt IGA solution. The course provides a good overview of the important features and capabilities of the Saviynt IGA solution to our Business Users.

Course Duration

- Two (2) hours of self-paced training
- 100% lecture

Delivery Methods

- Self-paced

Target Audience

- Business Users
- End Users

Course Objectives

By the end of this course, you should be able to meet the following objectives:

- Understand the concepts related to Saviynt's frictionless Access Request System.
- Learn how to use the Access Request System.
- Describe the concept Policies.
- Explain the Access Reviews module.
- Learn about Preventative and Detective SoD capabilities.
- Describe the Reporting functionality of Saviynt.
- Explain the concept Control Center.
- Understand the common use cases related to the various modules.

Saviynt IGA L100

Saviynt IGA L100 training focuses on covering the core concepts of the Saviynt IGA solution. This course provides a good preview of all the important IGA features and the capabilities that Saviynt offers. After attending this training, the learner will obtain the knowledge and skills required to configure various features, navigate the user interface, understand the common use cases, and perform administrative tasks against your identity infrastructure. This course is built on Saviynt EIC v24.x.

Course Duration

- Three (3) days of instructor-led classroom training
- 40% lecture, 60% hands-on lab

Target Audience

- IDM Consultants
- IDM Managers

Delivery Methods

- Classroom (In-person)
- Virtual Classroom (Live-Online)
- Onsite
- Self-Paced

Lab Environment

- The lab environment for this training will be available for 14 calendar days

Course Objectives

By the end of this course, you should be able to meet the following objectives:

- Understand how Saviynt's EIC can transform your enterprise.
- Understand the navigation of the Saviynt EIC user interface.
- Learn the basic concepts and terminologies related to IGA.
- Learn about how to import user and application data to build an identity warehouse.
- Understand the difference between connected and disconnected applications.
- Understand SSO implementation.
- Learn about EICs Application Onboarding and Management.
- Learn about the SAV Roles.
- Learn how to request application access for yourself and others.
- Understand how to set up an access request approval process using Workflows.
- Understand the automation of provisioning birthright access and other access for employees using Technical and User Update Rules.
- Learn about Email Templates and SMTP.
- Understand about Certifications.
- Learn about the features and configurations of various Access Reviews.
- Understand how to identify and resolve different risks in your identity application using Attestation.
- Learn about how to create different actionable reports using Saviynt Analytics.
- Learn about the Control Centre.

Saviynt IGA Level 200

The Level 200 training is the next level of IGA training that Saviynt offers. This three-day, hands-on training provides you with the advanced knowledge, skills, and abilities to achieve competence in deploying complex identity solutions using Saviynt IGA. The training provides a deep-dive preview of the IGA features such as Advanced Access Request capabilities, Rest connectors, Saviynt APIs, Service Account Management, Group Management in EIC, Advanced Intelligence and Saviynt integration with ServiceNow. This course is built on EIC v24.x.

Course Duration

- Three (3) days of instructor-led classroom training 50% lecture, 50% hands-on lab

Target Audience

- IDM Consultants/Architects/Experts
- IDM Managers

Delivery Methods

- Classroom (In-person)
- Virtual Classroom (Live-Online)
- Self-Paced
- Onsite

Pre-requisite

- Saviynt IGA Level 100 training or Equivalent knowledge and administration experience

Course Objectives

By the end of this course, you should be able to meet the following objectives:

- Learn about the advanced capabilities of Access Request System
- Learn about the different Rest connector integrations.
- Understand how to use Saviynt APIs for different use cases.
- Understand Service Account Management and configurations.
- Learn about Group Management in Saviynt.
- Onboard Active Directory and manage AD groups.
- Understand the concepts of Duplicate Identity Management.
- Learn about the EIC integration with ServiceNow.
- Learn about Role Mining and Role Management.
- Set up Peer Access Analytics for recommendations.

Saviynt IGA Marathon

The IGA Marathon training aims to enhance your knowledge and skill to use and implement Saviynt’s Enterprise Identity Cloud (EIC) platform. During this five-day hands-on training we will cover content from both IGA L100 and IGA L200 courses. This course is built on Saviynt EIC v24.x.

Course Duration

- Five (5) days of instructor-led classroom training
- 40% lecture, 60% hands-on lab

Target Audience

- IDM Consultants/Architects/Experts
- IDM Managers

Delivery Methods

- Classroom (In-person)
- Virtual Classroom (Live-Online)
- Self-Paced
- Onsite

Lab Environment

- The lab environment for this training will be available for 14 calendar days

IGA Level 100

Course Objectives

By the end of this course, you should be able to meet the following objectives:

- Understand how Saviynt's EIC can transform your enterprise.
- Understand the navigation of the Saviynt EIC user interface.
- Learn the basic concepts and terminologies related to IGA.
- Learn about how to import user and application data to build an identity warehouse.
- Understand the difference between connected and disconnected applications.
- Understand SSO implementation.
- Learn about EICs Application Onboarding and Management.
- Learn about the SAV Roles.
- Learn how to request application access for yourself and others.
- Understand how to set up an access request approval process using Workflows.
- Understand the automation of provisioning birthright access and other access for employees using Technical and User Update Rules.
- Learn about Email Templates and SMTP.
- Understand about Certifications.
- Learn about the features and configurations of various Access Reviews.
- Understand how to identify and resolve different risks in your identity application using Attestation.
- Learn about how to create different actionable reports using Saviynt Analytics.
- Learn about the Control Centre.

IGA Level 200

Course Objectives

By the end of this course, you should be able to meet the following objectives:

- Learn about the advanced capabilities of Access Request System
- Learn about the different Rest connector integrations.
- Understand how to use Saviynt APIs for different use cases.
- Understand Service Account Management and configurations.
- Learn about Group Management in Saviynt.
- Onboard Active Directory and manage AD groups.
- Understand the concepts of Duplicate Identity Management.
- Learn about the EIC integration with ServiceNow.
- Learn about Role Mining and Role Management.
- Set up Peer Access Analytics for recommendations.

Saviynt IGA for MSPs

Saviynt IGA for MSPs self-paced course is designed to enable Service Partners to manage and configure Saviynt's Enterprise Identity Cloud (EIC). In this course, you will learn how to triage issues more effectively, learn about best practices and troubleshooting methodologies. You will learn about various data archiving options and application monitoring features available in EIC for improved performance. The course also covers Application Log analysis directly from the user interface.

Course Duration

- Two (2) hours of self-paced training

Delivery Methods

- Self-paced

Target Audience

- Managed Service Partners, Customers and Employees

Pre-requisite

- IGA L100, or, IGA L200 Training (Self-Paced/ILT)

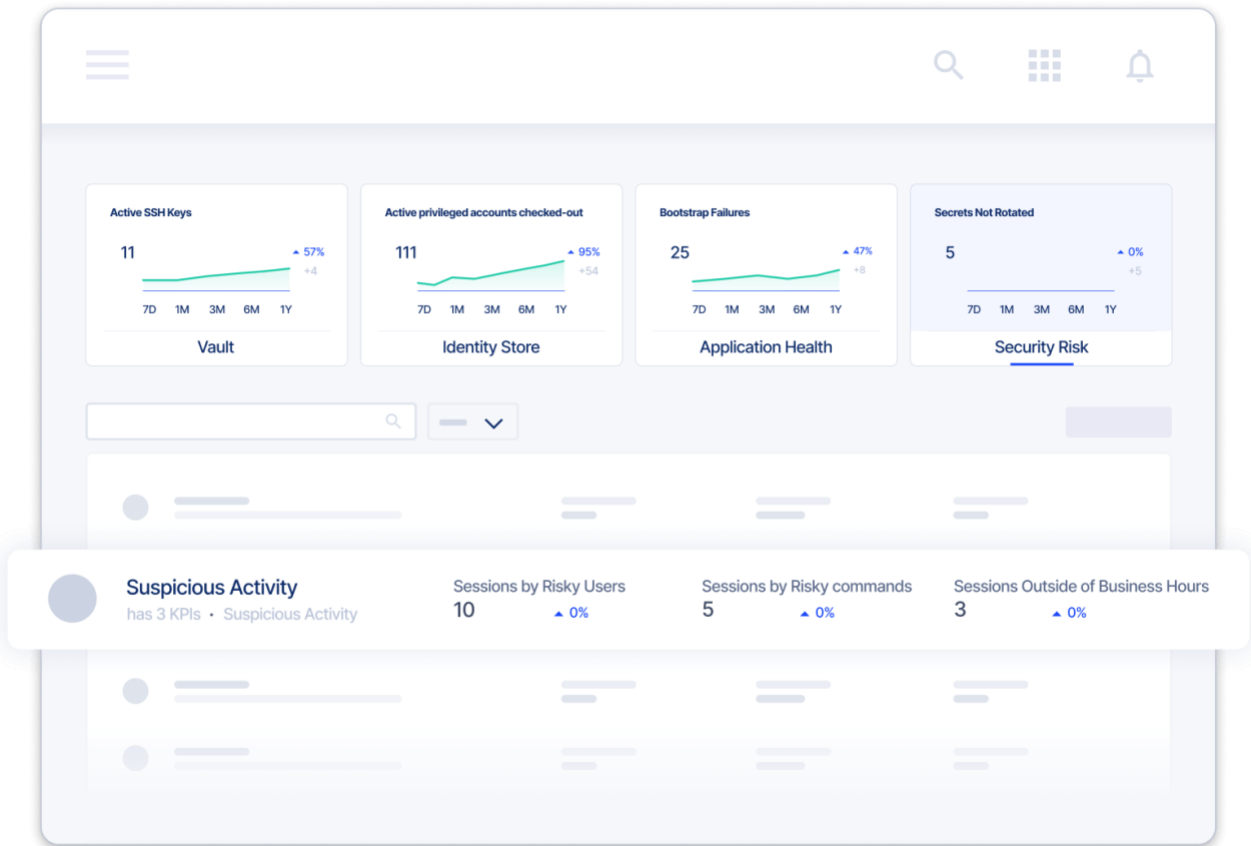

Course Objectives

By the end of this course, you should be able to meet the following objectives:

- Understand UI branding and Image changes from Saviynt UI.
- Manage label changes from Saviynt UI.
- Manage certificates from Saviynt UI.
- Manage SSO configuration from Saviynt UI.
- Manage extensions (custom jars), drivers and GSP modifications from Saviynt UI.
- Understand Job History Archival.
- Understand Request History Archival.
- Learn how to use Job Failure Notification Setup on Connection Level.
- Learn how to Test Connection Job setup.
- Learn about Job Monitoring and Alerting and Assured Compliance package through -Control Centre and Analytics.
- Describe application logs in Saviynt -various service logs.
- Understanding the Saviynt Object Schema.
- Understanding Feature Based Authorization.
- Learn how to use Data Analyzer to tackle data discrepancies.
- Learning about the best practices around Configurations.
- Learn how to troubleshoot connectivity related issues.

Saviynt Cloud Privileged Access Management (CPAM)

Available CPAM Training Courses

- Saviynt CPAM Fundamentals

e-learning course covering the basics of CPAM.

Course Duration

- 2.5 hours of self-paced training
- 90% lecture and 10% Demo

Delivery Methods

- Self-Paced

Target Audience

- Beginners, New Hires

Lab Environment

- *****This course does not have hands-on labs.*****

Course Objectives

By the end of this course, you should be able to meet the following objectives:

- Explain the importance of Cloud Security.
- Understand the basics of CPAM architecture and features.
- Learn about the CPAM support matrix.
- Understand various configurations required to setup CPAM.

Saviynt CPAM Quick Start Tutorials

e-learning course covering the basics of CPAM.

Course Duration

- 30 minutes e-learning content

Target Audience

- Beginners, New Hires

Delivery Methods

- Self-Paced

Lab Environment

- ***This course does not have hands-on labs.***

What does this training covers?

- Account visibility feature in CPAM
- AD Credential-less RDP Session Launch
- AD Credentials Checkout Request
- AWS Credential Checkout Password

Saviynt CPAM L100

Saviynt CPAM L100 training focuses on covering the core concepts of the product. This course provides a good preview of all the important CPAM features and capabilities that Saviynt offers. After attending this training, the learner will obtain the knowledge and skills required to configure various features, navigate the user interface, understand the common use cases, and perform administrative tasks related to CPAM infrastructure. This course is built on Saviynt EIC v24.x.

Course Duration

- Three (3) days of instructor-led classroom training
- 60% lecture, 40% hands-on lab

Target Audience

- PAM Consultants
- PAM Implementation team
- PAM PoC team
- PAM Product Management team
- PAM Support

Delivery Methods

- Classroom (In-person)
- Virtual Classroom (Live-Online)
- Self-Paced
- Onsite

Lab Environment

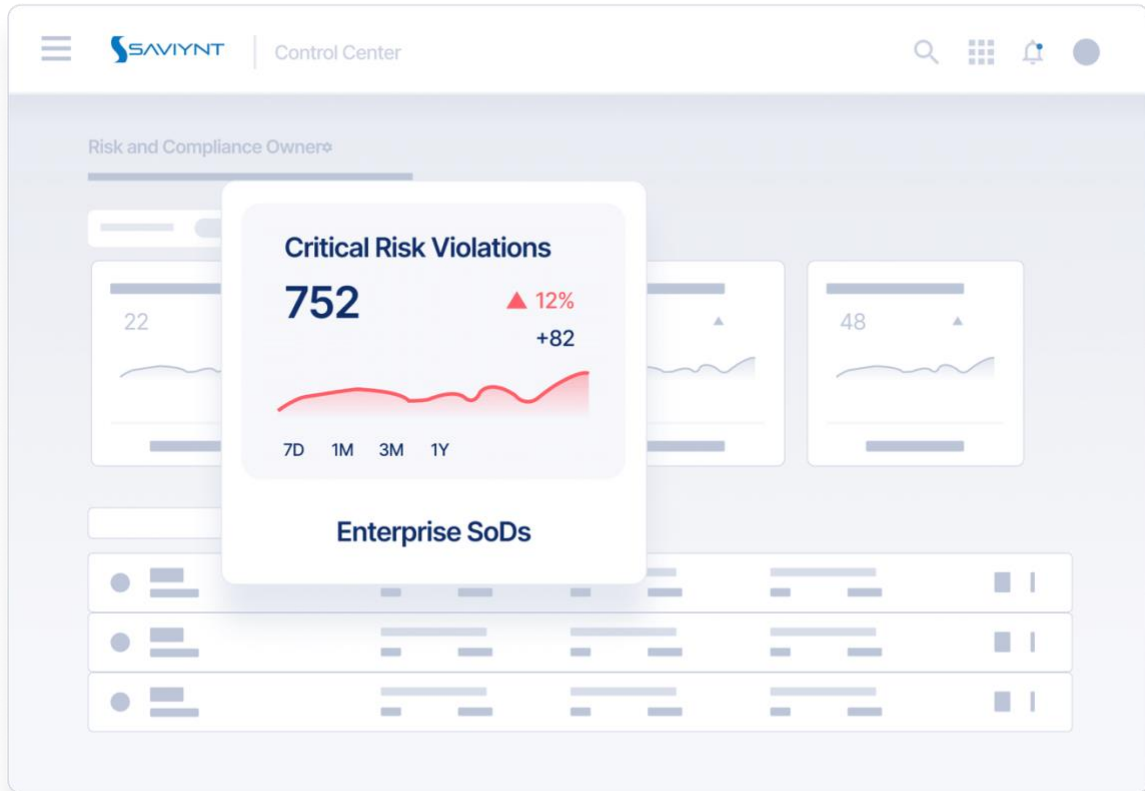

- The lab environment for this training will be available for 14 calendar days

Course Objectives

By the end of this course, you should be able to meet the following objectives:

- Understand the basics of CPAM architecture and features.
- Learn about the IGA concepts as pre-requisites for CPAM configurations.
- Explain how connections are set up and how PAM is configured for all Workloads.
- Learn about the various CPAM Methods, such as Credential-less, Credential, Just-In-Time, Role-based PAM for all Workloads.
- Learn about Workload onboarding for On-premises and Cloud.
- Explain how Accounts and Workloads are discovered.
- Understand the process of setting up a Vault connection.
- Learn about bootstrapping of Accounts and Workloads.
- Understand how PAM sessions are managed.
- Learn about the various KPIs and Controls related to PAM.
- Explain Password Management.

Application Access Governance (AAG)
