

RAAH IGA Foundation Accelerator

Seamlessly Automate Access, Fortify Security, and Establish Robust Governance from day one.

Connect Everything. Securely.

Problem Statement

Organizations embarking on their identity governance journey often encounter significant hurdles, including ad-hoc processes, limited visibility, and reliance on manual workflows. These challenges stem not only from technological limitations but also from a disconnect between tools, business objectives, and human-centric workflows. Without a well-defined and integrated strategy, organizations face heightened security risks, compliance failures, and mounting operational inefficiencies.

Solution Exchange Offering

The RAAH IGA Foundation Accelerator addresses these challenges head-on by establishing and implementing essential identity lifecycle management processes using Saviynt's advanced capabilities. This streamlined 16-week program integrates 1-2 sources of truth (SOTs) and up to 6 key applications, delivering immediate value through the automation of joiner, mover, and leaver workflows. By laying a robust foundation for identity governance, the accelerator enhances security, ensures compliance, and aligns seamlessly with business objectives. With tailored integrations and thorough knowledge transfer, it empowers organizations to achieve sustainable growth and long-term governance success.

Customer value

The RAAH IGA Foundation Accelerator empowers organizations to harness

the full potential of Saviynt by tailoring it to their unique operational and technical needs. By taking a holistic view of your business, we ensure that Saviynt is configured to seamlessly integrate with your workflows, enabling rapid results while setting the stage for sustained success.

Features

- **Automated Lifecycle Processes Build and Documentation:** We design and implement automated identity workflows (joiner, mover, and leaver) across Saviynt and connected or standalone systems. These workflows ensure consistent, secure, and efficient user access management. Comprehensive documentation is provided to cover both Saviynt and integrated system functionalities, enabling a clear, end-to-end understanding of the identity lifecycle for all stakeholders.
- **Saviynt Integration Services:** Effortlessly Integrate Your Services with Saviynt with the expertise of our team, we will help you seamlessly integrate your services with Saviynt. From building and testing to deploying tailored integrations, we ensure end-to-end visibility and comprehensive management of your systems and services, optimizing both efficiency and control across your organization.
- **Saviynt Integration Documentation:** This detailed documentation outlines the seamless integration of Saviynt into your workflows, offering clear visibility into your identity governance framework and its configuration. It ensures a complete understanding of how Saviynt supports your governance efforts and optimizes your operations.

Steps to Success with RAAH IGA Foundation Accelerator

- **Comprehensive Assessment:** We begin by immersing ourselves in your business's identity needs, carefully analyzing your technical infrastructure and operational workflows to identify areas for enhancement and potential opportunities.
- **Custom Design & Integration:** Utilize our profound enterprise expertise to personalize and integrate Saviynt's capabilities, ensuring they are fully aligned with your distinct business operations and regulatory compliance needs.
- **Rapid Implementation:** We rapidly deploy automated identity workflows, ensuring minimal disruption and delivering instant value through a time-tested and efficient approach.
- **Expert Testing & Validation:** Our technical team performs meticulous integration testing, ensuring flawless functionality and top-tier security before the solution goes live.
- **Detailed Documentation & Knowledge Transfer:** We supply in-depth documentation and conduct knowledge transfer sessions with your team, ensuring long-term success and complete operational visibility.

Customer Validation:

A national retail organization initially had a basic IGA strategy centered primarily on access management. After adopting the RAAH IGA Foundation Accelerator, the company achieved significant improvements, including:

- Automation of key lifecycle processes, streamlining operations and reducing manual interventions.
- Minimized errors and discrepancies in data across systems, ensuring greater accuracy and consistency.
- Reduced Helpdesk calls while boosting productivity for new hires and movers, ensuring smoother onboarding and transitions.
- Enhanced compliance visibility, laying the groundwork for continuous improvements in operational efficiency and governance.

Solution Benefits:

The RAAH IGA Foundation Accelerator drives rapid results by efficiently configuring Saviynt to automate critical identity lifecycle processes. Through industry-leading methodologies, we create a robust governance framework designed for long-term scalability. Our approach reduces access-related risks by centralizing identity management, while simplifying processes to enhance

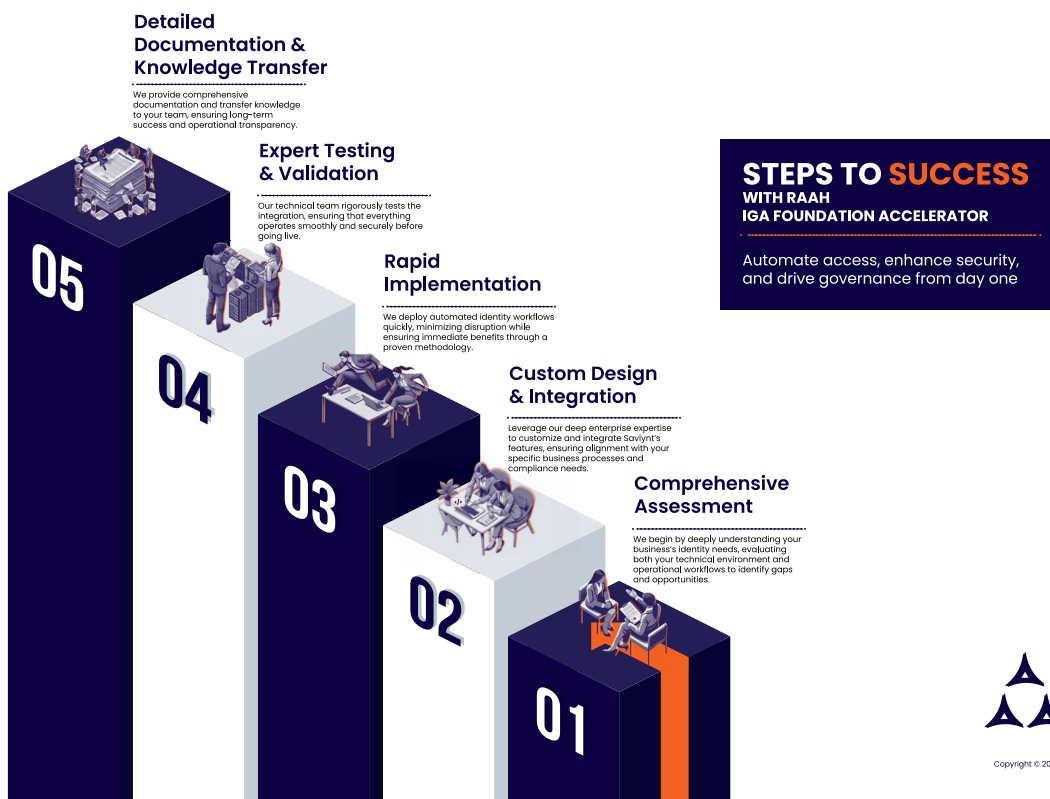

compliance efficiency. By automating manual tasks, we lower operational costs and decrease reliance on service desks. Additionally, we tailor Saviynt's features to align with your specific business needs, ensuring an optimized, user-friendly platform experience.

This offering is fully customizable to align with each client's unique needs and maturity levels. The package includes the following core services, with optional add-ons available to further tailor the solution:

- **Identity Business Process and Analysis Service:** We evaluate and optimize identity workflows across a wide range of applications and environments, ensuring they are closely aligned with your business objectives and technical needs. Our expertise extends beyond Saviynt, providing a comprehensive understanding of the broader application ecosystem it secures. This holistic approach enables us to manage identity across diverse contexts, enhancing security, efficiency, and overall governance.
- **Technical Advisory Service:** Our expertise extends far beyond basic Saviynt integration. We offer comprehensive guidance on how to seamlessly incorporate Saviynt into your existing infrastructure, whether you're securing legacy systems or modern cloud applications. By helping clients integrate identity management across a wide array of technologies, we

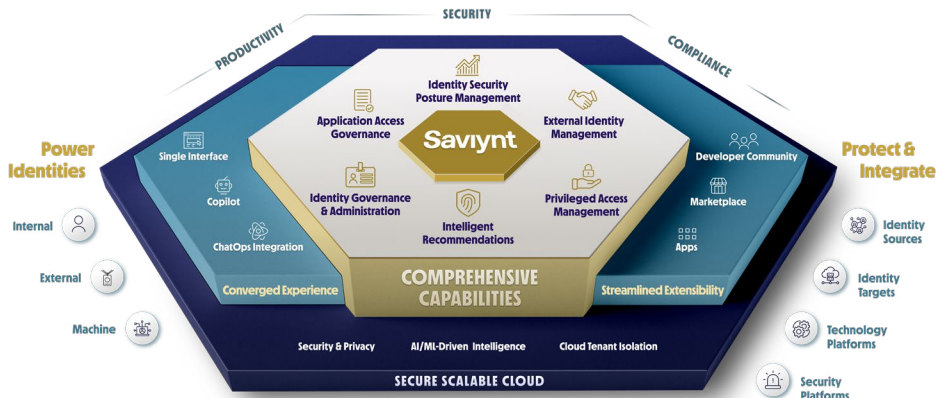

optimize both security and operational efficiency, ensuring a robust and future-proof solution.

- **Design and Implementation Services:** RAAH collaborates closely with your team to design customized identity governance solutions that are perfectly suited to your unique environment. This includes seamlessly integrating Saviynt with complex ecosystems, ensuring comprehensive management of all applications — both connected and disconnected. With deep expertise across various technical landscapes, we craft solutions that not only address your current challenges but also anticipate and prepare for future needs.
- **Hypercare & Optional Post-Production Support:** Following implementation, we provide Hypercare services to facilitate a smooth transition and address any early challenges. Additionally, we offer flexible, ongoing support beyond the standard package, ensuring your system operates optimally and adapts to evolving needs.
- **Optional Program Management and Advising Service:** Our program management ensures the smooth progression of every project phase, from planning to execution. We focus on aligning identity governance with your overarching business and IT objectives, providing not just Saviynt expertise but also valuable identity management insights to keep your organization ahead of evolving challenges.

The Identity Cloud combines core identity security capabilities in a single platform that enhances security while reducing costs and management headaches.

The Identity Cloud

Solution Benefits

- **Get Quick time-to-value:**
Rapid deployment for immediate impact.
- **Incorporate Industry-Leading Methodologies:**
Leverage proven frameworks for quick wins and long-term success.
- **Remediate and Mitigate Risks:**
Centralized management and automation enhance security.
- **Align Compliance Needs:**
Ensure seamless regulatory adherence while improving efficiency.
- **Slash Operational Costs:**
Automate identity tasks to reduce workload and inefficiencies.
- **Identify Opportunities:**
Assess Saviynt's strengths and areas for optimization
