SOLUTION GUIDE

Managed Platform Services for Azure Government Clouds

Connect Everything. Securely.

Problem Statement

Oxford Computer Group's Managed Platform Services enables both federal agencies and Independent Software Vendors (ISVs) to combine the benefits of a Software as a Service (SaaS) model with the enhanced security of Azure Government Clouds.

The 2021 Executive Order addressing cybersecurity prompted federal agencies to move to a SaaS model. Many ISVs can't run the SaaS service in the appropriate Azure Government Cloud due to security requirements. To address this issue, Oxford Computer Group (OCG) provides Managed Platform Services on a 365/24/7 basis to ensure the smooth, efficient, and secure operations of non-Microsoft solutions running in Azure Government Clouds.

Customer Value

OCG's Managed Platform Services Include:

- Implementation of patches and upgrades
- Security Technical Implementation Guide (STIG) compliance

- Managing the Authority to Operate (ATO) process
- Status reporting
- SIEM integration for security alerting
- Hosting and managing a GCC High tenant for your applications
- Attaining and managing certifications
- Managing compliance and security requirements
- Managing required connectors

Solution Benefits Features:

This service is tailored for: **Federal agencies** who want all the benefits of a SaaS-based application while leveraging the enhanced security features of Microsoft's Azure Government Clouds.

Independent Software Vendors who would like to serve federal customers but lack the bandwidth or security qualifications to provide a hosted service to a security-conscious federal agency.

Large defense contractors who are providing a complex set of applications to the federal government but lack the expertise to maintain all the applications.

Supported Azure Cloud Environments:

- M365 Government Community Cloud High (IL4)
- Azure Government (IL5)
- Azure Government Secret (IL6)

OCG's certifications and credentials:

- SOC 2 Type 2 attained for commercial tenant
- ISO 27001
- CISSP, PMP, and ITILv4 Foundation
